## ACP Works

Aluminium composite panels (acp), constructed from aluminium composite material (acm), are flat panels featuring two thin aluminium sheets coated with a protective layer and bonded to a non aluminium core. These panels are widely Utilized for building exteriors, facades, insulation, and signage.

ACP sheets are known for their durability, fire resACP sheets offer exceptional durability, fire resistance and weatherproofing, making them suitable for diverse uses such as cladding, signage and interior design.

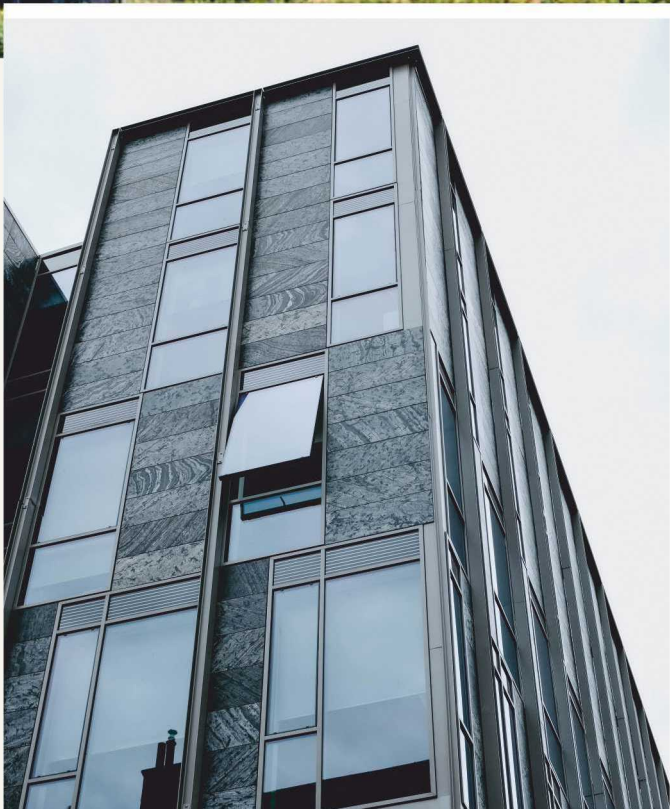

## Window System

- 18mm Premium Sliding Series
- 18mm Standard Sliding Series
- 25mm Sliding Series
- 60mm Sliding Series
- Casement Series
- Z-Casement Series
- Domal Series
- Ventena Series
- 3 In 1 Series
- Sliding Grilling
- Sliding Folding Series
- Balustrades
- Partition Work
- Louvers (Aluminum & GI)
- & Many More..

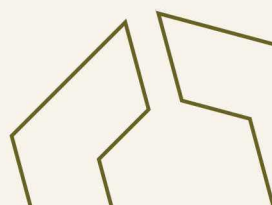

## Glass Glazing & Facade

Glass glazing refers to the process of fitting or installing glass into window frames, doors, or other structures. It plays a vital role in both residential and commercial buildings, enhancing aesthetics, insulation and energy efficiency.

### Types of Glass Glazing:

- **Single Glazing:** One layer of glass; basic insulation.
- **Double Glazing:** Two layers of glass with a spacer for better insulation and soundproofing.
- **Triple Glazing:** Three layers of glass for maximum thermal and acoustic insulation.
- **Tempered Glazing:** Heat-treated glass for strength and safety.
- **Laminated Glazing:** Layers of glass with interlayers for added durability and security.

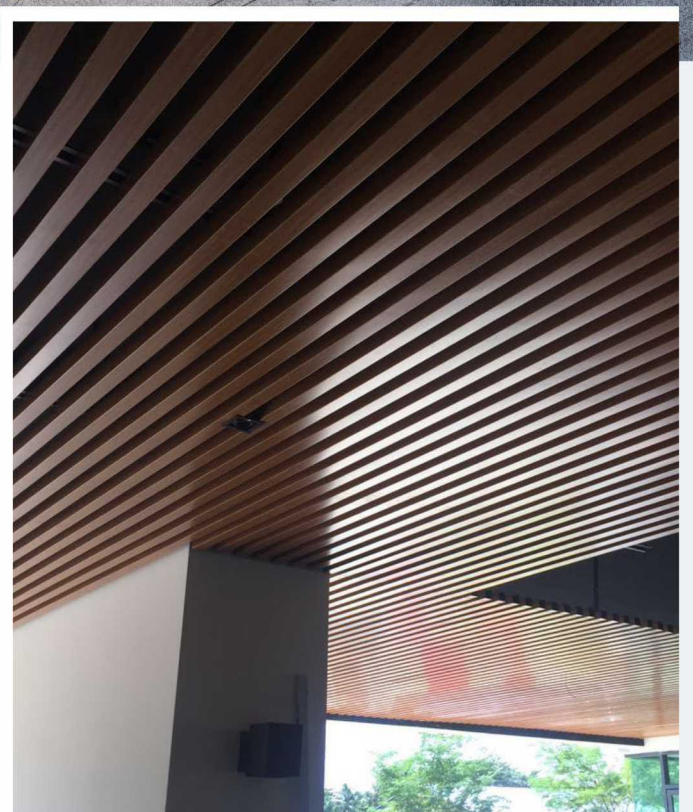

## Aluminium Louvers & GI Cillings

Aluminium louvers are architectural elements Designed to improve ventilation, provide Shade and enhance the aesthetic appeal of Buildings. They consist of horizontal or vertical Slats made from lightweight, durable Aluminum.

### Features:

- **Material** : corrosion-resistant, lightweight, and eco-friendly aluminum.
- **Design** : adjustable or fixed slats available in various shapes and sizes.
- **Applications** : used in building facades, HVAC systems, industrial facilities and residential spaces.

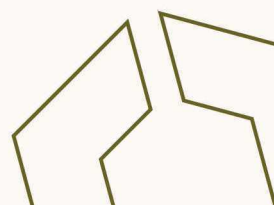

## Slim Partition

Slim partitions are sleek, durable and lightweight room dividers made from aluminum alloy (6063-t6) frames, often combined with 10–12 mm toughened glass.

### Details and Specifications:

- **Dimensions:** Typical profiles are 45 mm x 16 mm
- **Material:** High-grade Aluminium Alloy 6063-T6, offering corrosion resistance and high durability.
- **Features:** Low maintenance, high sound insulation and a minimalist design that maximizes light flow.
- **Applications:** Office cabin partitions, commercial interiors, sliding glass doors and shower enclosures.
- **Finish:** Available in powder-coated, anodized, wood grain or mill finish.
